Note on Printer Drivers:

Tests were performed with the HP LaserJet 5si driver (Windows XP/Vista) or the HP LaserJet 5200 PCL 5 driver (Windows 7) unless noted otherwise.

The following recommendations are for using colored slip sheets: Put the white letter/A4 paper in a lower tray number than the color letter/A4 paper so that the color letter tray does not become the default tray. If the white and color letter/A4 papers are placed in large trays, make sure that both are facing the same way, either portrait or landscape.

Note on TWAIN Drivers:

Feature sets included in TWAIN driver implementations may vary. TWAIN drivers with limited feature sets go by names such as Virtual TWAIN Driver and Push TWAIN Driver, and are not fully compliant TWAIN drivers.

IPRO Copy+ requires the following TWAIN functionality:

- It must allow the User dialog interface to be disabled.
- It must allow programmatic control of settings and initiation of scanning of images using standard TWAIN interface functions.

Note: Kofax TWAIN is NOT supported by IPRO Copy+.
