REVIEW

PRODUCTION

What others have to say:

"IPRO's Premium Scan offering is still, hands down the highest quality Scan and QC module for Litigation Support on the market. IPRO's site licensing ability makes it easy for PLATINUM|IDS to expand with large projects or additional demand, while avoiding the red tape of bundled software purchases and implementations."

- Sid Newby

IPRO Premium Scan is a production-level scanning system designed to significantly increase the efficiency of scanning operations for both service providers and law firms. It provides a flexible scanning environment and advanced features needed to deliver complex imaging projects. IPRO Premium Scan includes multiple levels of security and access control, workflow tools to automate project management, and multiple quality-control modules to analyze and detect issues before they become problems. IPRO Premium Scan supports industry standard image formats and is compatible with most document management and litigation applications.
