

IPRO SaaS, IPRO's online platform for Software as a Service, gives you access to the speed and power of IPRO software, eliminating infrastructure investment.

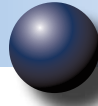

Value

- Effective cost recovery tools allowing you to bill on a "per client / matter number" basis
- The quickest access to IPRO's e-Discovery software
- Substantial cost savings and cost containment over traditional ESI processing and data review options
- Quickly and easily deploy an enterprise ESI processing solution with login access from anywhere

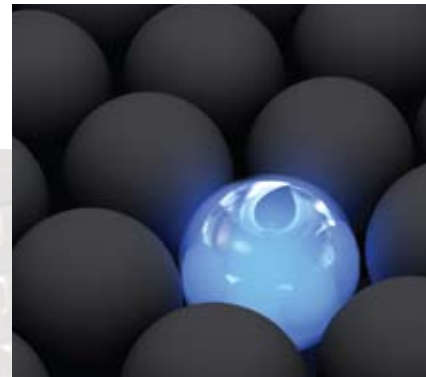

Reliability

- SAS-70 Certified environment
- Real-time industry leading technical support
- Actively managed infrastructure to assure peak performance and maximum uptime
- Acts as an extension of your firms existing IT resources

Control

- You maintain control of your data, decisions, costs, and workflow
- Your alternative to traditional ESI processing and data review options
- Scale our software and hardware to meet your needs
- Repeatable and defensible best practice processes

- PROCESSING
- REVIEW
- PRODUCTION

What others have to say:
"IPRO's SaaS system has been a wonderful tool for our shop. It gives us the speed and reliability of our in-house systems without the upfront cost of equipment and software. For smaller companies building an EDD division, this has been a great choice!"

VMAX**

IPRO SaaS offers a revolutionary software licensing model allowing you to process and review electronically stored information from anywhere. A dedicated IT Staff performs all required maintenance of the infrastructure, and your files are safely stored in a state of the art datacenter. You simply log on to process and review data collections securely and efficiently and when your project is done, so are the costs.

Why should I consider IPRO SaaS?

The ideal candidates for IPRO SaaS are service bureaus, law firms, corporate legal departments, government agencies and consultants that require flexible and cost effective access to powerful technology and hardware for ESI processing and document review.

The IPRO SaaS solution provides all the functionality of eCapture and eReview without any software or hardware investment. You run the project from your office just as you would if the software and hardware resided behind your firewall. eCapture provides powerful de-dupe, keyword and date filter capabilities to minimize the data set and the data loads real time into eReview as the data is processed for the quickest review access in the industry. Data processed by eCapture can also be effortlessly integrated into any review platform that you currently use.
