

IPRO SaaS, IPRO's online platform for Software as a Service, gives you access to the speed and power of IPRO software, eliminating infrastructure investment.

"IPRO [SaaS] provided remarkable flexibility, enabling us to employ a cost-effective processing strategy. We estimate this three-pronged method saved our client at least \$35,000 – and, equally important, we dramatically reduced the time and resources needed for our clients to review duplicate and irrelevant documents."

*Jud Parker
Principal
Digital Legal Tampa*

"By utilizing the SaaS format of eCapture, I was able to harness the capability of e-Capture almost immediately. The software worked exactly as promised and I was able to complete the project much more efficiently."

*Sidiki Bagayoko
Director of Litigation Support
Technology/Managing Partner
Tampa Legal Copies*

"It felt like a whole data center was at our disposal. This allows us to send information to the cloud, get it processed and have our customers access it there. Before, we'd get data in, we'd process it, shove it into an external hard drive, take it to our customer's data center and then upload it there"

*Christine Chalstrom
President
Shepherd Data Center
(as quoted in Baseline Magazine)*

"IPRO's SaaS system has been a wonderful tool for our shop. It gives us the speed and reliability of our in-house systems without the upfront cost of equipment and software. For smaller companies building an EDD division, this has been a great choice!"

*David K.
VMAX*

"Our experience with the IPRO SaaS model was outstanding. The product is easy to understand and IPRO's staff makes it easy to accomplish the desired end result we needed. Our training, project management, and technical support exceeded expectations. The SaaS model allows Services Bureaus like ours to ramp up for a very large production quickly and easily without additional capital investment or long term contracts. Great Service, Great Price.... We will be back on the SaaS soon."
