

IPRO V-Code Specifications

Last Updated: October 26, 2011

Workstation

The workstation that your unitizers and coders use, as well as the workstation that you use to perform administration, should meet these requirements.

Operating System	Windows 2000 Windows 2003 Windows 2008 Windows XP Windows Vista Windows 7 Latest OS service pack
CPU	Mid to high-end range processor PC
Memory	1 GB RAM (or greater)
Network Adapter	Standard LAN adapter. If remote user then high speed internet connection is required

V-Code Server or IPRO iNet

Operating System	<ul style="list-style-type: none">•Windows 2000 Server•Windows 2003 Server•Latest OS service pack• You must acquire client access licenses equal to the number of anticipated concurrent users
CPU	High-end range single or multi-processor PC
Memory	1 GB RAM (or greater)
Hard Drive	120 GB (or greater)
Video Subsystem	If the user is browsing the Internet with satisfactory results, their video subsystem is adequate for coding. Use a PCI or AGP video adapter with 8MB RAM and 19 inch monitor for ideal image resolution (1024 x 768) and performance
Network Adapter	PCI card with an interface compatible with your local network. "Server" adapters provide better performance
Tape Backup	DAT, DLT, or AIT format with sufficient uncompressed capacity to back up the entire hard drive storage space
Power Conditioning	Power supplied to the server should be conditioned to prevent power spikes, surges, brown-outs, and black-outs. If site power is not conditioned, an individual power conditioning appliance should be used between site power and this server
DVD/CD-ROM Reader	DVD/CD-ROM drive
Input Devices	A standard keyboard and mouse are required
