

IPRO eCapture completes ESI projects faster with less cost.

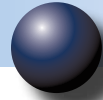

Value

- Internal processing at a fraction of the cost
- Minimize labor and maximize profitability
- Run multiple projects simultaneously
- Manage complete eDiscovery process with one application
- Proven multilingual conversion and normalization technology

Flexibility

- Powerful and efficient
- Plug-and-play scalability
- Fully multi-threaded
- Automated
- Truly distributed
- Powerful quality control module to streamline your throughput

Control

- Central operators console
- Handle virtually any electronic file type and email store
- Powerful searching, de-duping, filtering and compound document handling
- Flex-processing
- Self healing

PROCESSING

REVIEW

PRODUCTION

What others have to say:

"After evaluating 7 industry leading products, TERIS (formerly ALC Legal Technologies) selected IPRO eCapture as its primary e-Discovery processing 'Tool of Choice'. IPRO eCapture is the ideal processing application with its rapid search capability, superior QC module, and excellent customer support. eCapture is an all-in-one EDD tool that handles most of our processing and export needs, and its efficient self-distributing process means we can trust the project is running smoothly, without having to monitor worker stations."

**- Peter vR Sternkopf
TERIS**

IPRO eCapture is a powerful and innovative eDiscovery software application designed for speed and scalability to handle projects of any size with ease by simply adding workstations with IPRO's plug-and-play technology. The system you choose needs to be efficient, flexible, automated, customizable, and consistently perform at its peak to meet tight deadlines.

Find out why IPRO eCapture is the fastest growing and most widely used eDiscovery software application in the industry at www.iproecapture.com.
