Control

- Optional image key and message endorsement
- Exception and metadata slip sheet with independent paper tray selection
- Custom paper size option for images, information and exception slipsheets
- Full filtering options

PROCESSING

REVIEW

PRODUCTION

IPRO has other e-Discovery products for varying levels of data processing needs:

IPRO eCapture

Multi-threaded and distributed EDD product for large volumes of data that need to be processed quickly and efficiently.

IPRO eScan-IT

All-in-one printing, scanning and EDD application for standard workstations processing smaller volumes of data.

IPRO ePrint-IT is a powerful stand alone application designed to efficiently print multiple formats of electronic documents to paper with Bates numbering or custom messaging. With a simple and intuitive interface that allows for easy navigation, IPRO ePrint-IT allows access to options from a tabbed dialog box on a single screen.

The application allows for numbered metadata slipsheets from user selected papertrays, a variety of standard and custom filtering options and several document printing options. Metadata slip sheets may be printed for each file/document from any configurable printer tray, and alpha or Bates numbering can be stamped onto each output.

With its clean, easy-to-navigate structure, strong printing output capabilities and quick, efficient management of printing jobs, IPRO ePrint-IT is ideal for small scale e-Discovery output.
