

IPRO eScan-IT
Recommended Hardware/Software Specifications
WORKSTATION REQUIREMENTS

CPU (XP/2003 Server)	2 GHz Processor such as Pentium IV or AMD XP 2000+ (3 GHz Dual Core Processor recommended)
CPU (Vista/2008 Server)	2.4 GHz Processor such as Pentium IV or AMD XP 2400+ (3.2 GHz Dual Core Processor recommended)
Memory	1GB RAM (XP) 2GB RAM (Vista)
Hard Drive	120 GB hard drive with at least 150 MB available hard disk space. Note: The amount of hard disk space needed depends on the options selected and the amount of data to be processed. We recommend that at least two to three times of the amount of data to be processed be available on the hard drive, (e.g. if you are processing 10 GB of data, at least 30 GB should be available on your hard drive). A higher performance computer results in a better performance for eScan-IT.
USB Port	1 Port for licensing dongle - Each workstation needs to have a dongle in order to scan, import, discover files, or QC. Each workstation must have access to a shared network or local drive where the System file is located. To share Projects each workstation must have access to a shared network or local drive where the Data/Export files are located.
Video Subsystem	PCI or AGP video adapter with 16MB RAM (up to 64 MB for best performance) and a 19" monitor. Display should be set at 1024 x 768.
Input Devices	A keyboard and mouse are required.
Scanning Drivers	eScan-IT works with TWAIN and Kofax-supported scanners as well as digital copiers to scan papers and import previously scanned image files. IMPORTANT NOTE: eScan-IT supports the MS61 ISIS (or compatible driver) or the scanning manufacturers own ISIS developed drivers only. Drivers written under the new ISIS Pipes require royalties to Pixel Translations and are not currently supported.

eQC	
These workstations must have access to the System Directory and Data/Export directories. Each workstation needs to have a dongle in order to perform QC on EED batch.	
CPU (XP/2003 Server)	2 GHz Processor such as Pentium IV or AMD XP 2000+
CPU (Vista/2008 Server)	2.4 GHz Processor such as Pentium IV or AMD XP 2400+
Memory	1GB RAM (XP) 2GB RAM (Vista)
Hard Drive	120 GB hard drive with at least 150 MB available hard disk space. Note: The amount of hard disk space needed depends on the options selected and the amount of data to be processed. We recommend that at least two to three times of the amount of data to be processed be available on the hard drive, (e.g. if you are processing 10 GB of data, at least 30 GB should be available on your hard drive). A higher performance computer results in a better performance for eScan-IT.
Removable Media	CD/RW and/or DVD/RW Combo
USB Port	1 Port for licensing dongle - These workstations must have access to the network or local drive where the system files are located. Each workstation needs to have a dongle in order to scan, import, discover files, or QC.

Shared Software Requirements for eScan-IT & eQC Work Stations

eScan-IT is designed to be run on one or more computers that are networked to a server. eScan-IT Workstations should be dedicated to production and electronic discovery. eScan-IT uses certain settings in Microsoft Office 2003 or 2007, including Outlook and Outlook Express. Any customizations to Microsoft Office such as creating macros or modifying templates could affect the results of the documents processed on the workstation.

Operating Systems:	Software Requirements:
Microsoft Windows XP Professional SP2 or SP3, 32 Bit	Requires MS Office 2003 (Office 2007 Compatibility Pack), or MS Office 2007 Professional.
Microsoft Windows Vista Business SP1 or SP2, 32 Bit	Requires MS Office 2003 (Office 2007 Compatibility Pack), or MS Office 2007 Professional.
Microsoft Windows Server 2003 R2 Standard Edition SP 2 or Enterprise, 32 bit	Lotus Notes Client Install (8.0 Basic, 8.0 or 8.5), GroupWise Client (6.0), (6.5), (7.0)
Microsoft Windows Server 2008 R2 Standard Edition SP 2 or Enterprise, 32 bit	Lotus Notes Client Install (8.0 Basic, 8.0 or 8.5), GroupWise Client (7.0)
